Call for Papers: WASST 2027 ?

We welcome submissions to WASST 2027, the 1st Workshop on Security, Safety, and Trust for Agents on the Web, held with The Web Conference 2027 in Dublin, Ireland. Please see the workshop website (https://www-agent-sec.github.io/#topics) for the scope and topics of interest.

Submission tracks

- **Archival track:** long papers (up to 8 pages) and short papers (up to 4 pages), excluding references and appendices. Accepted papers will be included in the WWW 2027 Companion Proceedings (camera-ready details to follow shortly).
- **Non-archival track:** papers up to 8 pages. Accepted papers are presented at the workshop but not included in the proceedings.

Submission guidelines

- **Format:** Submissions must use the ACM sigconf template (https://www.acm.org/publications/proceedings-template) and be submitted as PDF.
- **Review:** All submissions undergo double-blind peer review by the program committee members led by the technical chairs. Papers must be strictly anonymous. Please remove author names and affiliations, avoid identifying self-citations, and do not link to repositories or websites that reveal author identity. Submissions that are not properly anonymised will be desk rejected.
- **Dual submission:** Dual submission is not allowed for the archival track. Papers under review or published elsewhere may be submitted to the non-archival track.
- **Submission site:** https://openreview.net/group?id=ACM.org/TheWebConf/2027/Workshop/WASST.
- **AI usage:** All submissions must adhere to the ACM Policy on Authorship. Generative AI tools cannot be listed as authors, and any use of them to generate content must be disclosed in the paper, for example in the acknowledgements.
- **Reciprocal reviewing**: At least one author of each submission may be required to serve as a reviewer for the workshop. Authors who are invited but fail to review responsibly may have their own submissions desk rejected.

```
